

Rock House Center

Agreed-Upon Procedures Report

June 30, 2020

Independent Accountant's Report

John R. Murphy, Founder
Rock House Center

We have performed the procedures enumerated at Exhibit A to evaluate the results of Rock House Center's Motive Transition Therapy® program from inception through June 30, 2020. Rock House Center management is responsible for results of the Motive Transition Therapy® program.

Rock House Center has agreed to and acknowledged that the procedures performed are appropriate to meet the intended purpose of calculating the average improvement due to effectiveness of the Motive Transition Therapy® program. This report may not be suitable for any other purpose. The procedures performed may not address all the items of interest to a user of this report and may not meet the needs of all users of this report, and as such, users are responsible for determining whether the procedures performed are appropriate for their purposes.

The procedures and the associated findings are described in Exhibit A.

We were engaged by Rock House Center to perform this agreed-upon procedures engagement and conducted our engagement in accordance with attestation standards established by the AICPA. We were not engaged to and did not conduct an examination or review engagement, the objective of which would be the expression or an opinion or conclusion, respectively, on the effectiveness of the program from inception through June 30, 2020. Accordingly, we do not express such an opinion or conclusion. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

We are required to be independent of Rock House Center and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements related to our agreed-upon procedures engagement.

Rock House Center

Exhibit A: Agreed-Upon Procedures List and Findings

For the 358 participants available for testing, we obtained:

- a. Payment history from Rock House Center's management.
- b. Self-assessment surveys taken at the start of the program from management, and
- c. Self-assessment surveys taken at the end of the program from management.

We performed the following procedures:

- a. Verified existence of participants selected by tracing names on the self-assessments to the payment history.
- b. Mathematically calculated the average improvement due to effectiveness of the Motive Transition Therapy® program. Agreed-upon guidelines specified that only beginning survey answers over 3 would be included in the calculation.

Our calculations indicated the following:

1. Anxiety, Worry -
 - a. Number of participants experiencing symptoms at the beginning of the program: 315
 - b. Average improvement calculated: 70%
2. Panic -
 - a. Number of participants experiencing symptoms at the beginning of the program: 173
 - b. Average improvement calculated: 88%
3. Fear -
 - a. Number of participants experiencing symptoms at the beginning of the program: 259
 - b. Average improvement calculated: 79%
4. Phobias -
 - a. Number of participants experiencing symptoms at the beginning of the program: 74
 - b. Average improvement calculated: 90%
5. Depression -
 - a. Number of participants experiencing symptoms at the beginning of the program: 243
 - b. Average improvement calculated: 81%
6. Grief -
 - a. Number of participants experiencing symptoms at the beginning of the program: 191
 - b. Average improvement calculated: 81%
7. Guilt -
 - a. Number of participants experiencing symptoms at the beginning of the program: 262
 - b. Average improvement calculated: 82%
8. Hopelessness/Despair -
 - a. Number of participants experiencing symptoms at the beginning of the program: 216
 - b. Average improvement calculated: 86%
9. Anger -
 - a. Number of participants experiencing symptoms at the beginning of the program: 235
 - b. Average improvement calculated: 80%
10. Lack of Confidence -
 - a. Number of participants experiencing symptoms at the beginning of the program: 264
 - b. Average improvement calculated: 73%
11. Stress -
 - a. Number of participants experiencing symptoms at the beginning of the program: 322
 - b. Average improvement calculated: 71%
